

Notion MCP Benchmark

The main purpose of this benchmark is to compare the official MCP offered by the Notion vs the MCPs built by third party vendors for Notion.

The same prompts are run under identical conditions, once against the Notion's official MCP and then against the MCP provided by third party vendors.

Stacks compared

Official: Notion's own first-party MCP server. The baseline every variant is measured against.

Executor: An open-source third-party MCP for Notion — github.com/RhysSullivan/executor (2,048 stars).

Composio: Composio's third-party MCP for Notion.

Hintas: The MCP built by Hintas for Notion.

Results — 56 prompts

Metric	Official	Executor	Composio	Hintas
Success rate	68%	71%	79%	80%
Avg tool calls / prompt	7.3	10.0	4.6	5.3
Tool failures	12	10	2	0
Comparable subset — all four pass (30 prompts)				
· Avg tokens / prompt	2,113	2,005	1,308	1,952
· Avg wall-clock	44.6s	47.6s	38.1s	44.4s

Green marks the best value in each row.

Hintas leads on success rate (80%) and reliability, with zero tool failures.
